

Cable Temperature Sensor QAP21.2

for applications up to 180 °C

Use

The cable temperature sensor is used for acquiring high medium temperatures. It is especially suited for acquiring the medium temperature in flat solar collectors.

Ordering

When ordering, please give type reference of cable temperature sensor and type reference of the accessories required.

Function

The sensor acquires the medium temperature in the solar panel with its nickel element. The resistance value of the element changes as a function of the temperature. It is delivered for further handling by a suitable controller.

Sensing element

Characteristic

Accuracy

Legend

- R Resistance value in Ohm
 θ Temperature in degrees Celsius
 $\Delta\theta$ Temperature differential in Kelvin

Mechanical design

The cable temperature sensor consists of a sleeve (6 mm diameter, 50 mm long), sensing element and connecting cable with ferrules.
 The sensing element is accommodated in the sleeve which is flat on one side and to which the connecting cable is attached.
 The sensor is not suited for direct immersion in liquid media (without using a protection pocket).

Accessories (not included with standard delivery)

Name	Type reference
Protection pocket, Ms63, PN10, immersion length 100 mm	ALT-SB100 ¹⁾

1) For other protection pocket accessories, refer to Data Sheet N1194.

Engineering notes

The permissible cable lengths are dependent on the type of controller used. For details, refer to the Data Sheet of the relevant controller.

Mounting notes

The following mounting choices exist:

On pipes

- Up to medium temperatures of 85 °C: with plastic cable tie (supplied by thirds)
- Up to medium temperatures of 220 °C: with stainless steel cable tie (supplied by thirds)

Indirect immersion

With the help of a protection pocket. The inside diameter of the pocket should match the diameter of the sensor's sleeve (e.g. 6.1 mm).
 The sensor is supplied complete with Mounting Instructions.

Technical data

Functional data	Measurement range	-30 ... +180 °C	
	max. (1-2 h/d)	220 °C	
	Sensing element	LG-Ni 1000	
	Time constant t_{63}	When fitted to the pipe	<20 s
		With protection pocket	<30 s
Measurement accuracy at 0 °C	±0.4 K (refer to "Function")		
Protective data	Measurement and output	passive	
	Degree of protection	IP 67 to IEC 529	
	Safety class	III to EN 60 730	
Connections	Mechanically	cable tie or protection pocket (supplied by thirds)	
	Electrical connections		
	Connecting cable	2-core, interchangeable, with ferrules	
	Cable length	approx. 1.5 m	
	Perm. cable length	refer to "Engineering notes"	
Environmental conditions	Ambient temperature		
	Sensor sleeve	-30 ... +180 °C (220 °C for max. 1-2 h/d)	
	Connecting cable	-50 ... +180 °C (220 °C for max. 1-2 h/d)	
Materials	Sensor sleeve	stainless steel V4A (1.4571)	
	Connecting cable	silicon	
	Packaging (minigrip® bag)	PVC	
Weight	Including packaging	0.056 kg
